Foil Label

# TYPES OF CLOSURE

## Paper and Foil Based Closures

Consumers value **attractive promotional products**, cued by **promotional activities** that stand out on shelf.

The rigid paper can is a better platform for your promotion as we have a better flexibility in printing support.

Registered Membrane

Continuous Printed Membrane

White Paper Membrane

Plain Foil Membrane

## Metal and Plastic Closures

A wide range of top membranes and easy-open ends, as well as steel bottoms, means you can customize your can based on your brands functional and aesthetic needs.

Easy-Open End

Sealed Safe

Ultraseal

Penny Lever

Full Open With Scoop

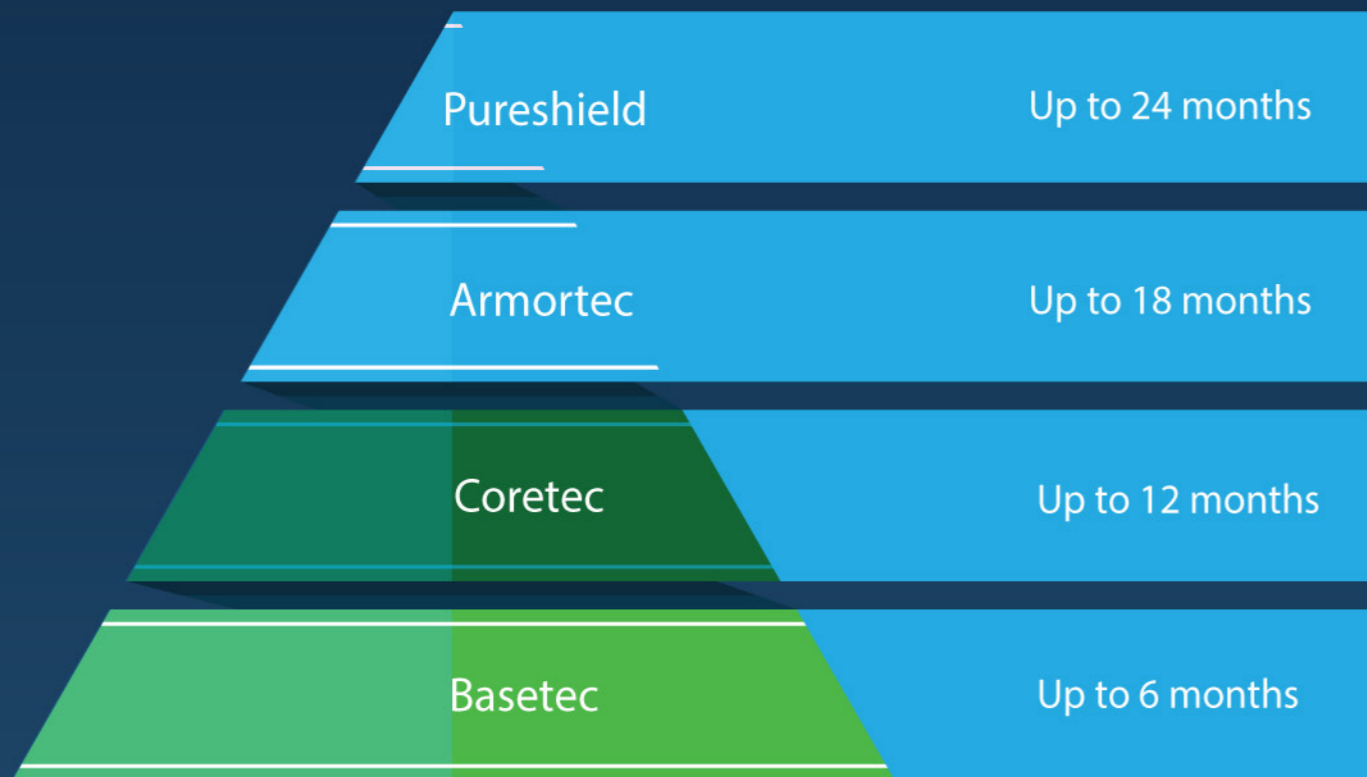

Shaker Top

## LINERS & SHELF LIFE

The liner of the can determines the shelf life of the canister, it is customized based on your products and requirements. Thus, depending on the material of the barrier (liner), the shelf life of our canister may be up to 24 months!

### Shelf life / Barrier

## THE RIGID PAPER CANS

### Uncanny Performance

Great - looking packaging alone won't win repeat buyers. We evaluated performance and determined that composite cans excel at providing protection for delicate foods and maintaining freshness, both before and after the container is opened.

### Preserve Freshness

Foods need to be as fresh as possible when customers open the package. Composite cans are vacuumed - sealed to help prevent damage from air and moisture, ensuring a fresh product and a happy customer. In fact, 89 percent of female consumers with one or more children believe composite cans keep their food safe.

### Prevent Crushing

Ever open up a bag of delicious snack dust? Composite cans provide complete protection for delicate flakes and chips, resulting in up to 50 percent less breakage. Consumers believe that the composite can protects their food due to its sturdy structure.

### Eliminate Spoilage

Customers don't want to feel like they wasted money on a product that went stale over night. An easy-to-seal container helps maintain the freshness they want without the hassle of having to use a separate closure, like a chip clip (or whatever is on hand, be it a rubber band, hair tie, or - the worst we've heard - jumper cables). Ninety-five percent of women who have at least one child agree that products packaged in a composite can are convenient for their family to use.

# LOCATION MAP

Globally, Sonoco Products Company has served various markets for more than 120 years, currently in more than 85 nations with 300+ global plants. Our global footprint helps us leverage our diverse technical capabilities and experience to understand your needs no matter where your customers are and our Asia plants get your solution to you on time and cost-effectively.

# WE'RE READY TO GO.
